

THE SIMONS EMMY NOETHER VISITING FELLOWSHIP at Perimeter Institute for Theoretical Physics

Emmy Noether was a brilliant scientist whose work underpins much of modern physics.

The Simons Emmy Noether Visiting Fellowship program honours her legacy by supporting and encouraging gender diversity in science.

The Fellowships bring talented researchers to the Institute at a critical stage of their careers. Fellows enjoy uninterrupted research time immersed in Perimeter's collaborative environment. The flexibility of the program enables researchers to shape their visit in a way that suits their research and lives.

The Simons Emmy Noether Visiting Fellowship are held for periods of **up to one year**. Start time is flexible. Female faculty-level physicists at universities or equivalent at research centres are encouraged to apply. We welcome all candidates to apply online by **January 13, 2020**, however applications will be considered until all positions are filled.

Apply online at www.perimeterinstitute.ca/emmynoether

"The Emmy Noether fellowship made it possible to move our family halfway across the globe for a year, which is no mean feat," says Sumati Surya, a 2016/17 Emmy Noether Visiting Fellow and associate professor at India's Raman Research Institute. *"This experience has injected great energy and inspiration for my research, which is invaluable."*
